# “Easy Access”

## PE and GRP dispenser sumps

The “Easy Access” Polyethylene Dispenser Sumps range includes two box sizes and a series of sturdy steel frames to suit different dispensers. The PE boxes feature an extra large base (30” or 762mm) for easy installation and access to the pipe fittings.

Stiffening ribs ensure the box rigidity. The box can be trimmed on site to adjust for burial depth.

Un-cuffed dispenser sump base require bulkhead fittings or spin weld cuffs for versatility in positioning pipe and conduit entries.

The galvanized steel frames come with rain lip. The shear valve stabilizer bar is included with the frame.

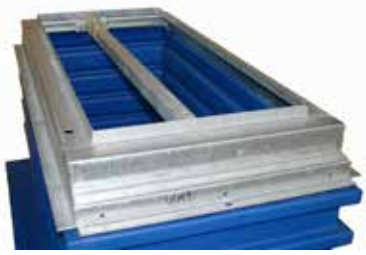

### Stocking made easier with “Easy Access” sump
